HTML (Hypertext Markup Language)

- **<u>FOUNDER</u>** : sir Tim Berners- Lee in late 1991 but official released in 1995 as HTML 2.0

- HTML was developed with the main aim of enabling users to create web pages in a very uncomplicated and engaging way.

- The first version of HTML (HTML 1.0) was released in1993 to enable data sharing, which would be very accessible .

- Then came HTML 2.0 , HTML 3.0, HTML 4.01 and HTML 5.0, which was released in 2012 is still used till date.

- USE OF HTML- Web development

- IDE – intellij idea is good for CSS IDE but also supports HTML and simple text editor which allows you to write codes The HTML 5.0 is a really good version because works with almost all IDE's very easily
